HOW TO USE A TEMPERATURE ONLY TMP102

DOCUMENTATION

ACTIVITY

ASSESSMENT

USEFUL LINKS

WHAT IT IS?

Provides fast and precise temperature readings.

WHEN TO USE IT?

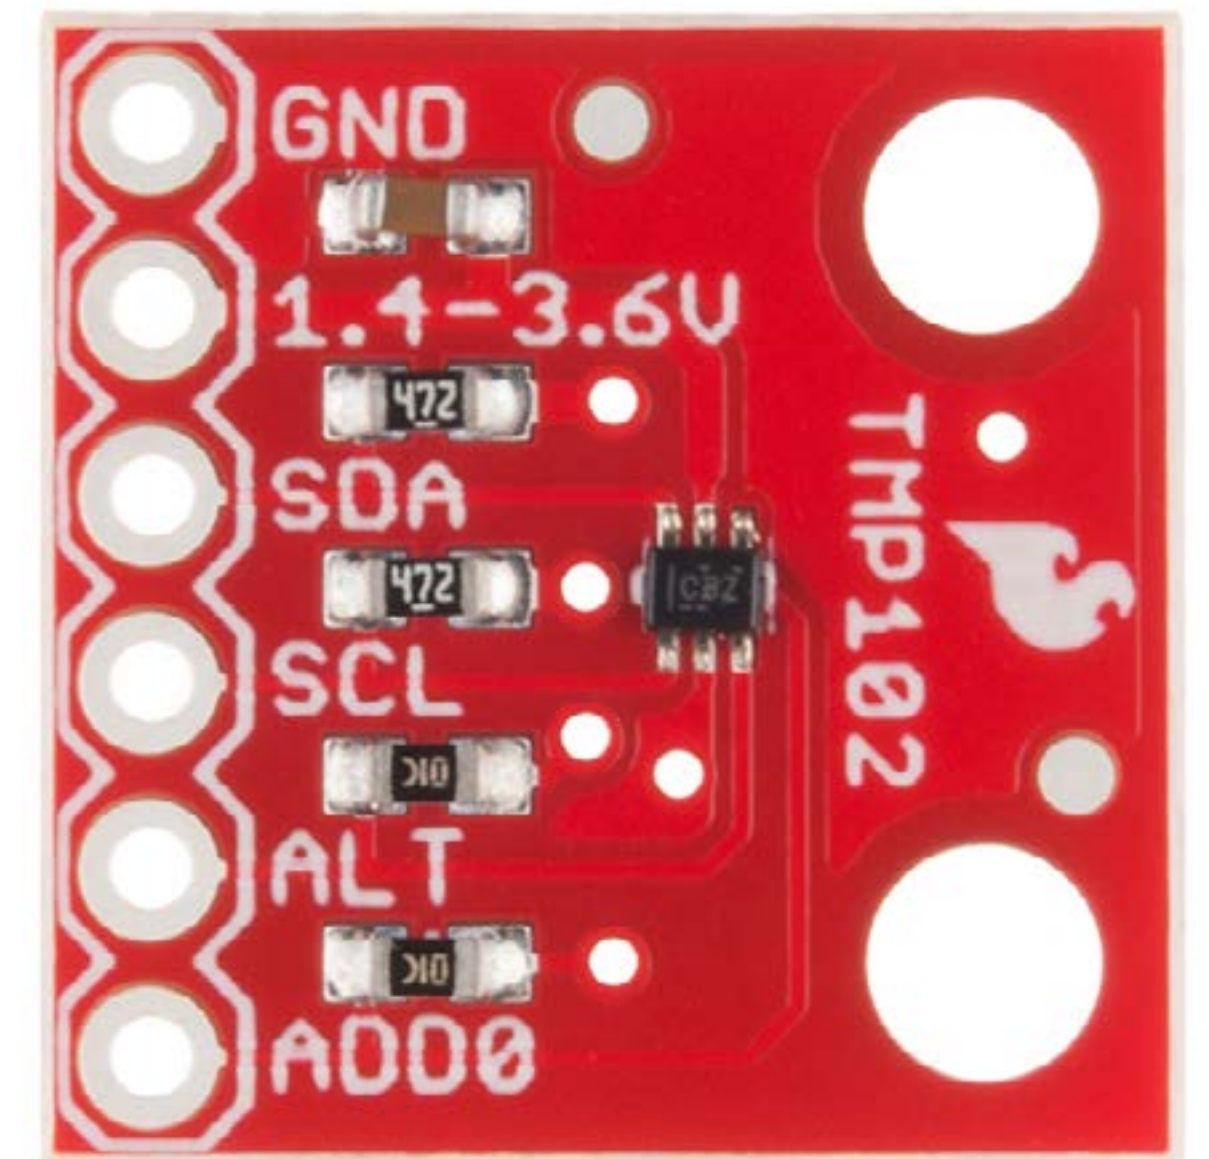

It can handle higher temperatures than a DHT11/DHT22, which makes it ideal to monitor high temperature in electronic equipment.

WHAT ABOUT *OTHER TEMPERATURE SENSORS*?

The DHT11 AND DHT22 are ideal for environmental sensing, when humidity is also required.

CHALLENGE:

1. Print Temperature data on Serial Monitor

Follow the tutorial:

<https://www.hackster.io/yanvaf/arduino-and-tmp102-temperature-sensor-11bd94>

2. Upload a video (aprox 10 seconds) showing your achievements.
